GreenPro Materials II

Pathway Material designed to enhance the natural beauty of the landscape while providing a sound, safe trail surface

www.GreenProMaterials.com

Heritage Trail's ability to drain while remaining durable and erosion resistant makes it environmentally friendly and sustainable. Using Heritage Trail in your application could gain you points toward LEED. With proper design and the addition of Stabilizer natural binder, Heritage Trail can be blended to meet ADA compliance and municipal requirements.

Ideal For:

- Hiking Trails**
- Golf Cart Paths**
- Greenways**
- Botanical Gardens**
- Green Roofs**
- Parks and Recreation Areas**
- Athletic Complexes**

In a reponse to a call for economical but durable alternative to concrete, asphalt and other hardscape applications, GreenPro Materials has developed Heritage Trail

Heritage Trail is comprised of angular stone, stone fines, silts, and clays.

These individual products are blended through a computerized plant in order to ensure the correctpercentage for each project.

GreenPro Materials is a leading supplier of a full line of Engineered Sands and Soils including golf course rootzone and sands, athletic field mixes and topdressings, decorative stone, lightweight growing media and Stabilizer Solutions products

GreenPro Materials has provided products to many important clients. Just a few are:

- Liberty National Golf Course
- Knickerbocker Golf Course
- Grounds for Sculpture
- Trump National Golf Course
- Rutgers University
- Central Park Conservancy
- Monmouth County Parks
- Columbia University
- Bronx Zoo
- Princeton University
- Morris County Park Commission
